

AMERICAN DENTAL PRODUCTS' DENTIN DESENSITIZER SYSTEM (DDS) WITH FLUORIDE

DDS was engineered by Dr. George Nicolae a scientist with 55 years' experience in the scientific research with patents and scientific publications.

DDS has a unique formulation with a strong antimicrobial ingredient approved by FDA to be used for sensitive teeth since 1997 without creating pain from irritation to the soft tissue, gingiva.

DDS is used for removing sensitivity in seconds:

ROOT SENSITIVITY	CERVICAL SENSITIVITY
PERIODONTICS' SENSITIVITY	TEETH SENSITIVITY from GUM BLEEDINGS INFLAMMATORY DISEASE
	LISTED by Independent research studies as EXCELLENT since 1999

Can be applied with a cotton swab or placed 1-2 drops on a wet tooth brush to all teeth with sensitivity without irritation of the soft tissues.

Most dentists are addicted to use DDS successful in millions of applications for more than 20 years to all patients.

To place an order please call 800-846-7120 or e-mail at [george@amdental.com](mailto:george@amdental.com) providing shipping address and phone numbers, e-mails.

I am offering an unconditional guarantee that if DDS does not eliminate virtually all post op sensitivity, I will refund your money for 30 days-no questions asked. In 20 years on the market there were not complains or returns.
